Project Technical Manager	6 – 8 Years	40	30	24
Architect	8+ Years	45	35	30
Project Manager/Coordinator	8+ years	50	40	35

For State-of-Art Technologies

We facilitate our employees to upgrade skill through our pilot projects and keep them ready for deployment. In other skill sets are required for a particular requirement, we find the right resources from known sources and execute the project, though at a reasonably higher cost.

In such cases where availability of resources are limited we try to

- Fulfill the requirement in reasonably skill-available latest and new technologies
- Engage Freelancers/Consultants to get the solution developed and deployed

Success Characteristics

Low TCO
Business Ethics
Outcome Certainty
Passionate Professionals
Small, Cohesive and Productive Team
Clear Communication and Conversation
Responsive, Flexible and Stable Leadership
Experts in Agile and Water-fall Methodologies
Creating and Adopting Innovative Ideas/Methods
Technology Focus and Specialties In-house Trained
Expatriate Management - International Learning on Quality
Single Point of Contact, Ownership and Delivery Commitment
Operating in Low Cost Locations Where Highly Skilled Resources are Available
5 Years in Industry Crossing Lean Patches and Troubled Times - Proven Sustainability
